Rapid Spool Change Tabber System

The RSC Tabber (Rapid Spool Change) provides more production time between loading spools and simplifies the tabbing process providing the best ROI in the market today.

Features / Benefits

- Dual Spools provide greater number of tabs available for production
- Simplified threading path, reduces time for spool changing, two spools on unit
- Applies tabs, labels, stamps and post-it notes
- Mobile base
- Up to 30,000 pieces per hour
- Apply 1 to 8 tabs in one pass
- Patented "Twist-Belt" sealing function provides tightest tab seal
- Venturi for offloading waste web
- Roll changes over in one minute
- Low tab sensor pauses unit so the operator can quickly splice in a fresh tab roll
- Accepts all USPS approved automated sizes
- Slide tab heads over and apply labels flat on the product or seal a gatefold. Apply marketing stickers, "piggybacks" or USPS self-adhesive stamps
- Unique registering allows the unit to tab difficult products like folded, multi-page, newspaper flyers/catalogs with shingled edges or smaller digest size booklets

Operator Interface

- Bi-Lingual - English and Spanish
- Store over 100 jobs for repetitive jobs
- Six inch color touch screen
- Improved security levels
- Auto-Place feature maintains tab placement as product lengths change.

Options

- 19" Spools
- Bump turn with height adjustment
- 4-1/2 " web width extension kit

Product Sizes:

- Min. 3" x 6"
- Max. 9" x 12"

Product Thickness:

- Tabbing 5/16"
- Labeling 5/16"

Pass-line Height:

- 34.5" – 38.5"

Power

- 115 VAC 10 Amp- Single Phase

Dimensions

- 65" High
- 44" Long
- 37" Wide

Venturi

- 12 to 15 psi required
