

SD 520/920

Shingle Stream Delivery Conveyor

The SD 520 & SD 920 delivery conveyors are simple, sturdy conveyors. They are 5 & 9 feet long respectively with a single wide belt running the length of the conveyor and can be arranged to run in-line with the prior unit or at a right angle. These deliveries have a very high storage capacity while allowing the operators access to all of the product. Included is an electronic variable speed with speed shifting capability for batching or sorting. Height adjustment is made by lengthening the support legs.

Standard Equipment

- Adjustable height
- Heavy-duty framework
- Rugged gear motor
- DC variable speed
- Includes speed shift capability for batching or sorting
- 220v AC (115v AC optional)
